

TUK

A smart touch-up kit designed for speed of use and ease of repair

Aerospace Coatings

Our familiar AkzoNobel coatings are now available in an easy-to-use touch-up kit called TUK. The TUK makes touch-up and repair quick, easy and clean, and comes in a re-sealable container for maximum flexibility and minimum waste. Easy mixing makes the TUK readily available for anyone to use within minutes.

TUK comprises a ready-to-mix base and hardener in two separate compartments, encapsulated into a single plastic container. The user simply removes the ring on the cap of the container and presses it down until it clicks. After shaking to ensure the base and the hardener are properly mixed, the cap can be unscrewed, and the coating is ready to apply. AkzoNobel's new regular TUKs hold between 30-45ml whereas its mini-TUKs can hold as little as 8ml (up to 20ml), depending on the product mixing ratio.

The new TUK is guaranteed to have the high level of quality that AkzoNobel customers demand and is manufactured and tested in line with our stringent quality control procedures. With short lead times and low minimum order quantities, TUK provides a fast, high quality solution to keep your production line rolling.

Features and benefits of the system

Feature

Benefit

TUK holds AkzoNobel products in ready-to-mix quantities

Customers reduce time and paint lost on mixing mistakes, spills or complicated application processes

TUK can be ordered in small quantities, with a minimum order quantity of 48 on structural products and 10 on interior cabin coatings

Customers reduce paint waste and the cost associated with waste handling

Easy to handle design

TUK is accessible even to inexperienced users

Ready to go in minutes

Customers' cycle time is accelerated

Short delivery lead times

Aircraft on Ground (AOG) time is reduced

TUK has been especially designed to be ready for use with any applicator, including the ability to fit a Preval spray to the bottle's neck

Customers have the flexibility to use TUK for various jobs, using their own preferred applicators

Re-sealable container

TUK can be carried around your plant or workstation without risk of spillage

How to use TUK

Remove ring

Press down on cap until it clicks

Shake well to mix component

Unscrew and use

Packaging sizes

Regular TUK:

Holds 30ml – 45ml
(depending on product mixing ratio)

Mini TUK:

Holds 8ml – 20ml
(depending on product mixing ratio)
